Re: Site Inspection, Parley's Canyon Quarry

On June 14, 1988 Holland Shepherd and I met with Tom Saunders and Taylor Leaming of Lone Star's Salt Lake office at the Parley's Canyon Quarry. Also in attendance was Lone Star's attorney, Glen Fuller, and Walter Greer, Lone Star's environmental coordinator from the Houston office.

The quarry is located primarily on fee land with a small portion on state land and another small area on unpatented BLM claims. The mine dates back to 1896 and was already developed to its full 60 acre extent when the Mined Land Reclamation Act was passed in 1975.

Mr. Saunders indicated that he spoke with Mary Boucek of the Division in 1983 when Lone Star acquired the Utah Portland operation. Mary indicated at that time that the Division wanted the new proposed quarries in Tooele County permitted (i.e., Little Mountain and Quarry Antone), but that the permitting of the Parley's operation would be deferred due to other Division priorities. Lone Star mined the site from 1983 to 1985. It was estimated that the quarry area utilized during this period was small, but when combined with the plant site the two acre threshold for exemption status was exceeded.

The Lone Star representatives requested that the Division send them a letter which stated our authority for requiring reclamation on the site and which described the reclamation that we would require.
